

**INTELLIGENT**  
ROOFING SOLUTIONS

## AIRPORT ROOFING SOLUTIONS

### **What about exposure to jet fuel?**

In addition to common rooftop contaminants and environmental challenges, airport roofing has to stand up to long-term exposure to potentially damaging substances such as jet fuel.

FiberTite, with its proprietary formula containing the highest DuPont Elvaloy® KEE content, remains flexible and delivers outstanding protection in the most challenging conditions. In fact, FiberTite is the only membrane to exceed the ASTM D 6754-2 specification for KEE-based sheet roofing.

### **Destined for long-term success.**

FiberTite's unique formula and manufacturing processes make it ideal for airport roofing projects, providing long-term resistance to jet fuel and other hazards. In addition, it can withstand the most extreme weather and environmental challenges, from intense high temperatures, UV rays, hurricane-strength winds, torrential rains and freezing cold.

### **Roofs that are long lasting and virtually maintenance free.**

Whether it's a new roof or a re-roofing project, buildings situated at airports need a roof that will stand up to these challenges and also be a cost efficient choice over the long run. The real cost of a roofing system is more than just the initial expense. The true cost has to be measured over the effective life of the roof. What does it cost to maintain and repair your roof? What is the energy savings component built into your roof? How long will the roof last? All these components and more must be considered to understand the true roofing cost. It's something called life cycle costing, and one of our representatives would be happy to demonstrate it for you. FiberTite roofing systems are proven to require minimal maintenance and virtually no repair costs. In addition, FiberTite is both Energy Star and Cool Roof compliant and conforms to all LEED standards. We're confident that once all of the facts are laid out, you'll agree. A FiberTite roof is not only the most effective protection solution – it's also the most cost efficient.
