

HEALTHCARE ROOFING SOLUTIONS

**INTELLIGENT
ROOFING SOLUTIONS**

Incomparable puncture resistance.

A roofing system built for hospitals and healthcare facilities has to be, above all else, puncture resistant and durable. The last thing you can afford is a leaky roof damaging your expensive and valuable assets. A FiberTite® roofing system is built for just such an application. We begin with the industry's highest tensile polyester yarns, densely packed and knitted together to lay the strongest fabric foundation available in a roofing membrane. In addition, our heat-welded seam provides a molecular bond that is ten times stronger than an adhesive seam. These types of built-in strengths are what have allowed over 99% of the roofing systems we have ever installed to still be performing to this day – some of them are a quarter of a century old.

It's a formula for success.

No other roofing membrane can match the formula for success that a FiberTite membrane provides. Our proprietary formula has the highest DuPont Elvaloy® KEE content, keeping our roofs flexible and protecting long beyond those of our competitors. A FiberTite membrane is flame resistant, that is to say it is self-extinguishing, adding an element of safety to your buildings that cannot be overstated. And because of the multiple systems available, you can put it down without interfering with the normal day-to-day operations that are common in the healthcare industry. It's the same base formula we have been using from the beginning, because unlike most of our competition – we got it right the first time.

Energy efficient. Longer life. It all adds up.

The true cost of a roofing system has to be measured over the effective life of the roof. What does it cost to maintain and repair your roof? What is the energy savings component built into your roof? How long will the roof last? All of these components and more are what give you the true picture of your roofing cost. It's something called life cycle costing, and one of our representatives would be happy to demonstrate it to you. We're confident that once all of the facts are laid out in front of you, you'll agree. A FiberTite roof is not only the most effective protection solution you can have – it's also the most cost efficient. In addition, FiberTite is both Energy Star and Cool Roof compliant and conforms to all LEED standards.

HEALTHCARE ROOFING PROJECTS

INTELLIGENT
ROOFING SOLUTIONS

For healthcare roofing applications, FiberTite has demonstrated its outstanding performance – cost-effective, long-lasting on even the most complex roofs. Here are a few examples:

<u>Corporation</u>	<u>Location</u>
Aetna Health Care NC	
Alfred I. DuPont Hospital for Children	DE
Bayer Plasma Facility	NC
Blue Cross Blue Shield	AZ
Boulder Community Hospital.....	CO
Carilion Radford Community Hospital	VA
Columbia HCA	Various
Duke University Medical Center.....	NC
Gem City Bone & Joint Clinic	WY
Georgetown University Hospital	DC
Kindred Hospitals.....	Westminster, CA
Medical College of Virginia	VA
Orlando Regional Medical Center	FL
Palmetto Baptist Medical Center.....	SC, FL
Rivercrest Healthcare	AZ
Sarasota Memorial Hospital.....	FL
St. Elizabeth's Hospital.....	WI
St. John's Health Center	Santa Monica, CA
St. Joseph's Hospital.....	CO
University of Central Florida.....	FL
Villa Rosa Hospital.....	TX
Wake Forest University School of Medicine.....	NC
Woodland Medical Center.....	MI
