

## HOSPITALITY ROOFING SOLUTIONS

**INTELLIGENT**  
ROOFING SOLUTIONS

### **Hospitality roofing requirements.**

A significant blend of reliability and versatility are important factors in specifying roofing products for the hospitality industry. These roofs protect the assets of hotels, motels, restaurants, casinos and other similar establishments. Another factor is the ease of installation, since most hospitality businesses are reluctant to close during remodeling or repairs.

### **Looking good, and performing even better.**

FiberTite, with its proprietary formula containing the highest DuPont Elvaloy® KEE content, remains flexible and delivers outstanding protection in any environment. In fact, FiberTite is the only membrane to exceed the ASTM D 6754-2 specification for KEE-based sheet roofing.

FiberTite's unique formula and manufacturing processes make it ideal for hospitality roofing projects, offering aesthetic appeal and the option of custom color matching. It's also strong enough to withstand the most extreme weather and environmental challenges, from intense high temperatures, UV rays, hurricane-strength winds, torrential rains and freezing cold. Plus, for restaurants whose roofs are subjected to the effects of fatty acids, oils and greases that are generated on a daily basis, no other roofing product has been able to withstand these challenges like FiberTite.

### **The smart choice of hospitality businesses everywhere.**

Whether it's a new roof or a re-roofing project, businesses in the hospitality industry typically are very budget-conscious with a need to be ultra-cost efficient. The real cost of a roofing system is more than just the initial expense. The true cost has to be measured over the effective life of the roof. What does it cost to maintain and repair your roof? What is the energy savings component built into your roof? How long will the roof last? All these components and more must be considered to understand the true roofing cost. It's something called life cycle costing, and one of our representatives would be happy to demonstrate it for you. FiberTite roofing systems are proven to require minimal maintenance and virtually no repair costs. In addition, FiberTite is both Energy Star and Cool Roof compliant and conforms to all LEED standards.
