

**INTELLIGENT
ROOFING SOLUTIONS**

ROOFING SOLUTIONS FOR MANUFACTURING FACILITIES

Roofs for manufacturing and industrial facilities.

Manufacturing facilities represent multiple and varied roofing challenges. These roofs may be exposed to harsh chemicals, temperature extremes and equipment installations in addition to the effects of weather.

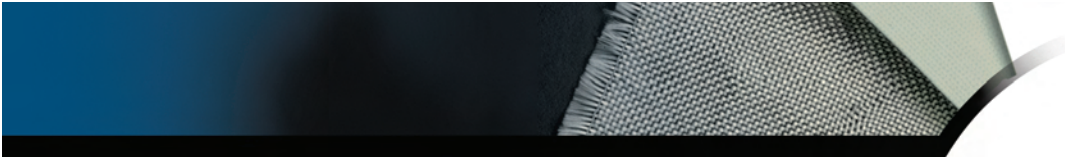

Designed for performance.

FiberTite's unique formula and manufacturing processes make it ideal for roofing projects at manufacturing facilities, offering long-term resistance to corrosive chemicals, harsh exhausts, equipment movement and foot traffic. In addition, it can withstand the most extreme weather and environmental challenges, from intense high temperatures, UV rays, hurricane-strength winds, torrential rains and freezing cold.

FiberTite also contains the highest DuPont Elvaloy® KEE content, remaining flexible and delivering outstanding protection in any setting. In fact, FiberTite is the only membrane to exceed the ASTM D 6754-2 specification for KEE-based sheet roofing.

Minimize your maintenance and energy costs.

They all look good at first, but the real cost of a roofing system is more than just the initial expense. The true cost has to be measured over the effective life of the roof. What does it cost to maintain and repair your roof? What is the energy savings component built into your roof? How long will the roof last? All these components and more must be considered to understand the true roofing cost. It's something called life cycle costing, and one of our representatives would be happy to demonstrate it for you. Whether it's a new roof or a re-roofing project, FiberTite roofing systems are cost efficient and proven to require minimal maintenance and virtually no repair costs. In addition, FiberTite is both Energy Star and Cool Roof compliant and conforms to all LEED standards.

ROOFING SOLUTIONS FOR MANUFACTURING FACILITIES

INTELLIGENT
ROOFING SOLUTIONS

Manufacturing facilities can represent multiple and varied roofing challenges. These roofs may be exposed to harsh chemicals, temperature extremes and equipment installations in addition to the effects of weather. FiberTite offers outstanding performance in a manufacturing setting – here are some examples:

Corporation	Location
Brithnee Electric.....	
Caterpillar.....	
Chrysler.....	
Dow Chemical.....
