ROOFING SOLUTIONS

RETAIL ROOFING SOLUTIONS

Retail roofing requirements.

Roofing projects for retail establishments and shopping malls typically require a unique blend of versatility and creativity. But, in addition to looking good, these roofs must also be able to withstand challenges such as the effects of food court exhaust.

Not just good looking, it's also incredibly tough.

FiberTite, with its proprietary formula containing the highest DuPont Elvaloy® KEE content, remains flexible and delivers outstanding protection in any setting. In fact, FiberTite is the only membrane to exceed the ASTM D 6754-2 specification for KEE-based sheet roofing.

FiberTite's unique formula and manufacturing processes make it ideal for retail roofing projects, offering aesthetic appeal, custom color matching and DuPont Tedlar® for long lasting good looks. It's also strong enough to withstand the most extreme weather and environmental challenges, from intense high temperatures, UV rays, hurricane-strength winds, torrential rains and freezing cold.

It's a smart choice.

Whether it's a new roof or a re-roofing project, retail buildings and shopping malls need to be cost efficient. The real cost of a roofing system is more than just the initial expense. The true cost has to be measured over the effective life of the roof. What does it cost to maintain and repair your roof? What is the energy savings component built into your roof? How long will the roof last? All these components and more must be considered to understand the true roofing cost. It's something called life cycle costing, and one of our representatives would be happy to demonstrate it for you. FiberTite roofing systems are proven to require minimal maintenance and virtually no repair costs. In addition, FiberTite is both Energy Star and Cool Roof compliant and conforms to all LEED standards.
