

SCHOOL ROOFING SOLUTIONS

**INTELLIGENT
ROOFING SOLUTIONS**

A roofing system designed for long-term performance.

The buildings designed for your school systems and campuses say a lot about the atmosphere and perception you are trying to convey. They need to be built to last and to make your students feel secure. A FiberTite® roofing membrane is built the same way. Over 99% of the roofing systems we have ever installed are still performing. In fact, we have roofs that were put down over a quarter of a century ago that still outperform other manufacturers' "new" roofs. Go ahead. Put us to the test. We're confident we'll exceed your expectations.

It's all in the chemistry.

No other roofing membrane can match the formula for success that a FiberTite membrane provides. Our proprietary formula has the highest DuPont Elvaloy® KEE content, keeping our roofs flexible and protecting long beyond those of our competitors. A FiberTite membrane is flame resistant, that is to say it is self-extinguishing, adding an element of safety to your buildings that cannot be overstated. And because our formula is odorless during installation, you can put it down without any interruption of your normal class schedules. In addition, no other membrane starts out with a base fabric that can match a FiberTite membrane for strength and durability.

Reading, writing, arithmetic and reliability.

Just like education can be broken down into the basic building blocks of learning, installation is just one of the parts of the total cost of a roof. The true cost has to be measured over the effective life of the roof. What does it cost to maintain and repair your roof? What is the energy savings component built into your roof? How long will the roof last? All of these components and more are what give you the true picture of your roofing cost. It's something called life cycle costing, and one of our representatives would be happy to demonstrate it to you. We're confident that once all of the facts are laid out in front of you, you'll agree. A FiberTite roof is not only the most effective protection solution you can have – it's also the most cost efficient. In addition, FiberTite is both Energy Star and Cool Roof compliant and conforms to all LEED standards.

SCHOOL ROOFING PROJECTS

INTELLIGENT
ROOFING SOLUTIONS

School systems are increasingly budget conscious – whether the roof is a replacement or for new construction, reliability and minimized maintenance are key parts of the cost equation. FiberTite earns high marks for cost effectiveness, energy efficiency and long-term performance at these facilities:

School	Location
Akron University	OH
Bristol Virginia Schools	VA
Broward County Schools.....	FL
California State University.....	CA
College of the Desert	
College of Wooster	OH
Dade County Schools	FL
Drake University	IA
Duke University	NC
Emory University.....	GA
Ft. Morgan Schools.....	CO
Kent State University.....	OH
Loyola Marymount.....	CA
Manatee County Schools	FL
North Shore School District	IL
Orange County Schools	FL
Palm Beach County Schools	FL
Sarasota County Schools	FL
The Columbus Academy	OH
Elgin County Schools, U-46 District	IL
Wake Forest University	NC
