

## FiberTite Architectural Metal Edge Systems

### Product Data

FiberTite offers a complete line of pre-engineered Architectural Metal edge flashing systems.

#### DESCRIPTION

FiberTite Architectural Metal Edge Systems are engineered and tested to withstand the harshest of conditions and are specifically designed to complement FiberTite Roofing Systems.

FiberTite AT Fascia consists of a heavy duty extruded aluminum anchor bar that secures the FiberTite membrane to the perimeter nailer. The anchor bar also functions as a receiver for the snap-on steel or aluminum metal fascia cover.

FiberTite 200 Fascia consists of a two piece 24-ga steel water dam and either aluminum or steel fascia combination.

FiberTite Architectural Metal Edge Systems are available in a variety of exterior finishes (natural mill, clear or anodized) and standard Kynar 500 colors.

Pre-finished and factory fabricated accessories including miters, spill outs for downspouts and scuppers are available for either the FiberTite AT or FiberTite 200 edge systems.

#### APPLICATION

Verify the edge systems profile and accuracy to fit the edge assembly prior to ordering/fabrication. FiberTite Architectural Metal Edge Systems shall be installed true and straight to substrates that are clean, dry and free of foreign matter.

For additional installation recommendations and requirements, please consult the most current versions of Seaman Corporation's Guide Specifications for the Installation of FiberTite Roofing Systems and FiberTite Construction Details.

#### PHYSICAL PROPERTIES

<i>FiberTite AT Fascia</i>	
<b>Anchor Bar</b>	6063-T6 alloy aluminum
<b>Fascia</b>	24 ga. Steel, 0.040, 0.050 or 0.063 in aluminum
<b>Lengths</b>	12 ft typical anchor bar and fascia
<i>FiberTite 200 Fascia</i>	
<b>Water Dam</b>	24 ga. Steel
<b>Fascia</b>	24 ga. Steel, 0.040, 0.050 or 0.063 in aluminum
<b>Lengths</b>	12 ft typical anchor bar and fascia
